

1

Aquariums

You will need:

A shoe box for every Joey Scout, cotton, glue, textas, shredded cellophane (blue or green), sheets of clear cellophane, sticky tape, wrapping paper (with a sea print), craft knife, scissors

Method:

1. Cut the bottom out of the shoe box, leaving about a 2cm border (see picture).
2. Glue clear cellophane on the inside of the bottom of the shoebox, which will now make a window.
3. The Joeys can draw an underwater scene on the lid or glue the wrapping paper to the inside of the lid AND the inside of the shoebox.
4. Glue shells and seaweed to the floor of the aquarium. You can also add shredded cellophane to the bottom.
5. Colour and cut out sea creatures.
6. Attach a length of cotton to the top of each one and hang the sea creatures from the top of the aquarium (secure with sticky tape).
7. You can use fine florist wire and plasticine to secure some creatures to the bottom of the tank (see picture).
8. Tape the lid to the shoebox to complete the aquarium.
