

Clay fish

Recipe for salt flour clay

You will need:

1 cup flour
1/3 cup salt
Food colouring
Water

Combine the flour, salt and food colouring and then mix in the water until a clay like consistency is reached.

How to make clay fish

1. Make separate clay shapes for the different parts of the fish eg: oval body, tail, fins, eyes, mouth
2. Stick all the pieces together
3. Paint it with bright coloured poster paint
4. It can be baked in a slow oven until hard. However, this may not be necessary as it will air dry anyway.
